

NATURE AND ENVIRONMENT CLUB 2015

The Ecology Society of Zakir Husain Delhi College was established with the main aim to raise awareness about environmental degradation and has so far achieved high measures of success.

This year the Ecology Society kicked off its activities with the inaugural talk by Ms BAHAR DUTT, a renowned wildlife journalist and an environmentalist followed by a visit by one of the most talked about NGOs around the globe "GREENPEACE". Our next initiative was to educate the youth about trees by organising a TREE CENSUS under the guidance of Ms PADMAVATI DVIVEDI President and Founder of NGO COMPASSIONATE LIVING. During DIWALI the society, with the help of NATIONAL SERVICE SCHEME (NSS) started an ANTI CRACKER CAMPAIGN along with the agenda to prevent CHILD LABOUR. In our much loved festival of colours, HOLI, the group organised a sale-cum-promotional event of organic and eco-friendly harmless colours and sensitised people about the effects of using the conventional chemical based colours. On 9th of March the Ecology Society went on a one day educational trip to ASOLA-BHATTI Wildlife Sanctuary with around 50 students to experience the beauty of nature. Every student was asked to prepare a report about their experience and share their views and insights. The ecology society students got the chance to join a global network of activists committed on taking the greatest challenge of our times, CLIMATE CHANGE. The Climate Reality Leadership Corps was founded by **Nobel Laureate and former U.S. Vice President Al Gore in 2006**. On February 22-24, 2015 the ecology society students got the chance to get trained personally by AL GORE and share information and skills during the training programme.
