### Learning Objectives

This course aims to deliver:

- Better understanding different types of diseases as knowledge of cause is the step towards the treatment.
- Discussion of Pathogenic, Pathological and molecular basis
- Detailed insight into the origin/basis of diseases (infectious, nutritional deficiency, metabolic disorder, molecular and genetic basis, endocrine disorder and lifestyle-based disorder)
- Learn the mechanism and mode of transmission of each disease.
- Learn about the deadly disease and the stage at which treatment is possible or can be implemented.

### Learning Outcomes

**Life cycle, mode of transmission, Prevention and cure**

- Understanding the different types of diseases, such as infectious diseases, endocrine Diseases, metabolic disorder-based diseases and lifestyle diseases.
- Detailed discussion of diseases and their type and molecular basis.
- Cause, pathogenesis and pathological basis.
- Importance of medical zoology with respect to identification of diseases.
- Discussion about treatment, prevention and cure brought enhancement of knowledge and understanding of the disease.
- Learn the mechanism of each disease so that inhibitor-based intervention can be tried to cure the disease.
- Better understanding that medical zoology focuses towards the solution of the problems (deals with cure and treatment).
